## 

Exploring Employment for Sub-Baccalaureate Workers Across Metro Areas and Over Time

## RALEIEH, NC

SHARE OF EMPLOYMENT BY EDUCATION AND WAGES

New research explores the economic opportunity available in 121 of the largest metro areas in the U.S. The report defines opportunity employment as jobs accessible to workers without a bachelor's degree and typically paying above the national annual median wage ( $\$ 37,690$ ), adjusted up or down to reflect the local cost of living. Occupations characterized by a high level of opportunity employment are called opportunity occupations. Nationally, the research finds that 21.6 percent of total employment can be classified as opportunity employment - a figure that varies greatly across the metro areas analyzed. In this region and nationally, the largest opportunity occupations represent a true cross section of the jobs available in today's economy.

RANK OUT OF 121 METRO AREAS

## TOP 10 OPPORTUNITY OCCUPATIONS IN 2017

## SECRETARIES AND ADMINISTRATIVE ASSISTANTS
